Executive Summary

A simple mistake by cyber spies has pulled back the curtain on a wide ranging espionage effort. It reached hospitals, government offices, and schools across several continents in early 2026. In mid April, operators left a staging server open with tools, command history, and phishing packages ready. That slip exposed an active campaign now tracked [8230;] The post Hackers' OPSEC Mistake Exposed a Global Espionage Campaign and Its New TriBack Malware appeared first on [**CONFIDENTIALITY NOTICE:** This report is classified PRO tier and intended exclusively for the named recipient.
