Executive Summary

Summary An authenticated path traversal in ``assets/icon`` allows local SVG file read by passing traversal sequences in the ``extension`` parameter. The issue is caused by file existence checks happening before extension validation. ### Details The endpoint: ``src/controllers/AssetsController.php:1115-1123`` - ``actionIcon(string $extension)`` calls ``Assets::iconPath($extension)`` and returns ``sendFile($path, ...)``. In ``Assets::iconPath()``: - Path is built from user-controlled ``extension``: ``src/helpers/Assets.php:906-909`` - If ``file_exists($path)`` is true, path is returned immediately: ``src/helpers/Assets.php:910-912`` Validation exists in ``Assets::iconSvg()``: ``preg_match('/^\w+$/, $extension)`` - ``src/helpers/Assets.php:927-931`` However, that validation is only reached if ``iconPath()`` does **not** find a file. So traversal payloads that resolve to existing ``.svg`` files bypass validation and are served by ``sendFile()``. ### Impact - Authenticated users can read local ``.s``

Indicators of Compromise (IOCs)

IOC extraction for this advisory is pending enrichment pipeline completion. PRO subscribers receive real-time IOC push to SIEM/SOAR via the SENTINEL APEX webhook at: **GET /api/v1/intell/iocs?advisory={id}**. Full IOC packages include IPv4, domain, SHA256, and URL indicators with confidence scores, first-seen timestamps, and STIX 2.1 formatted bundles.

Detection Engineering

Deploy these production-ready detection rules into your SIEM platform to identify exploitation attempts in real time. Compatible with Microsoft Sentinel, Splunk ES, and any Sigma-compatible platform.

Incident Response Playbook

Phase 1 - 0-24 Hours (Containment)

1. Activate IR team; assign lead analyst and executive sponsor.
2. Isolate or WAF-shield Craft CMS has authenticated path traversal in `assets/icon`, allowing local `.svg` file read instances exposed to the internet.

- 3. Enable verbose access logging on all Craft CMS has authenticated path traversal in `assets/icon`, allowing local `.svg` file read endpoints immediately.
- 4. Pull last 72h of web server and application logs for forensic baselining.
- 5. Check SENTINEL APEX IOC feeds and SIEM alerts for exploitation hits in your environment.
- 6. Notify relevant internal stakeholders and legal / compliance team.

Phase 2 - 24-72 Hours (Eradication)

- 1. Apply vendor patch for Craft CMS has authenticated path traversal in `assets/icon`, allowing local `.svg` file read or implement recommended mitigation.
- 2. Deploy Sigma and KQL detection rules from Section 6 across all SIEM platforms.
- 3. Rotate all API keys, service account credentials, and session tokens.
- 4. Conduct forensic timeline reconstruction for potential compromise window.
- 5. Validate patch deployment across 100% of affected instances via asset inventory.

Phase 3 - 7 Days (Recovery & Hardening)

- 1. Conduct post-incident review and update incident response runbooks.
- 2. Threat hunt for lateral movement or persistence artifacts using MITRE ATT&CK mapping.
- 3. Update asset inventory with patched version information and closure evidence.
- 4. Submit findings to internal risk register and CISO dashboard.
- 5. Schedule follow-up vulnerability scan to confirm remediation completeness.

Financial Impact Analysis (FAIR Model)

\$20K - \$180K Breach Cost Range (FAIR)	\$60K IBM Cost of Breach 2025 Median	\$25K/day Business Interruption Cost	N/A Regulatory Fine Exposure
---	--	--	--

Low severity findings require targeted patches. Aggregated low-severity debt compounds to medium breach probability within 12 months.

Remediation Cost Estimate: \$15K · Includes engineering time, IR retainer activation, forensic investigation, and customer notification costs.

Regulatory & Compliance Implications

Organizations processing this advisory must evaluate obligations under applicable regulatory frameworks. The table below maps this threat to relevant compliance requirements.

Framework	Reference	Obligation
ISO 27001:2022	A.8.8	Track and remediate within standard 90-day patch cycle

Framework	Reference	Obligation
NIST CSF 2.0	ID.RA	Include in regular vulnerability risk assessment

Actionable Recommendations

Prioritized defensive actions based on this period's intelligence.

1. Monitor Craft CMS has authenticated path traversal in `assets/icon`, allowing local `.svg` file read for escalation.
2. Apply patches in next maintenance window.
3. Apply vendor patch for Craft CMS has authenticated path traversal in `assets/icon`, allowing local `.svg` file read immediately - check NVD for official fix guidance.
4. Enable enhanced logging and alerting on all systems running affected software versions.
5. Deploy the Sigma detection rule from this report into your SIEM platform (Sentinel / Splunk / Elastic).
6. Audit all internet-facing instances of affected products and confirm patch deployment.
7. Conduct a threat hunt using MITRE ATT&CK techniques mapped in this advisory.
