### Top Threat Advisories

High-priority advisories ranked by CVSS score, exploitability, and actor attribution.

| Advisory Title                                                                   | Severity | CVSS | EPSS | AI Summary                                                  |
|----------------------------------------------------------------------------------|----------|------|------|-------------------------------------------------------------|
| Strengthening cyber capacity in Kenya: A new toolkit with lessons for the region | Low      | 3.9  | —    | [P4] Phishing - low severity (Risk 1.04/10). MITRE ATT&CK m |

### MITRE ATT&CK;® Coverage

ATT&CK; technique density score: 0.0 · Techniques observed: 0 · Tactics covered: 0

### Threat Actor Intelligence

Attribution analysis across advisories in this report period.

| Threat Actor | Advisory Count | Associated CVEs / Indicators |
|--------------|----------------|------------------------------|
| UNC-CDB      | 1              | —                            |

### Actionable Recommendations

Prioritized defensive actions based on this period's intelligence.

1. Monitor Strengthening cyber capacity in Kenya: A new toolkit with lessons for the region for escalation.
2. Apply patches in next maintenance window.
